

NO DISGRACE IN WAITING A CALL

NEVADA INDUSTRIES THREATENED OWING TO USE OF WORD "DRAFT"

The movement to enlist in the army is threatening to throw many of Nevada's industries into serious inconvenience. Down at Sparks so many young men are getting ready to enlist in the navy as to cause the shop chiefs anxiety and other large concerns are beginning to worry over what can be done to prevent a shut-down. Thirty to thirty-five apprentices at Sparks have gone to become sailors, says the Reno Gazette.

It appears that the use of the word "draft" in the dispatches and in general conversation is the cause of trouble, young men having obtained the idea that it would be something shameful to be "drafted" into the army, rather than to enlist voluntarily. It was pointed out this morning in conversation with a state official, however, that there is a misunderstanding of the meaning of "selective conscription." It does not mean "draft." Under the new law

when it shall be adopted this week, a date will be set by presidential proclamation for the registration of all able-bodied citizens between the ages specified in the bill—they have not been settled on finally as yet. After the registration goes into effect, the officers call up the men who are liable to service and select from them the most likely ones to make good soldiers.

Under the bill, certain industries are regarded as being of as much importance to the nation almost as the army and it is not planned to disturb men working in these trades. The list of such industries has not yet been settled and in one of the points on which a conference committee is working at Washington.

ORGANIZING ARMY OF HALF MILLION

(By Associated Press.)

WASHINGTON, D. C., May 5.—The full strength of the first army organized under the selective draft bill will be 18,538 officers and 528,659 enlisted men, making up 18 war strength divisions complete in every arm and supplemented by 16 regiments of heavy field artillery, equipped with large calibre howitzers.

Conferees of the senate and house hope to agree upon disputed features today, so as to send the bill to the president for his signature early next week.

Officers for the cavalry divisions will be trained at all of the 16 officers training camps, which will open within a few days with 40,000 prospective officers under training.

Each infantry division will consist of nine full regiments of infantry, three regiments of field artillery, one regiment of cavalry, one regiment of engineers, one division hospital and four camp infirmaries. The total strength of these 16 will be 15,022 officers and 439,092 men.

The two cavalry divisions combined will have 1214 officers and 32,062 fighting men including mounted engineers and horse artillery units and each will have also its divisional hospital and camp infirmaries. The proportion of coast artillery

troops to be provided out of the first 500,000 will be 666 officers and 20,000 men with requisite medical troops. Supplementing these tactical units will be the 16 regiments of heavy field artillery, strength 768 officers and 21,104 men; eight aero squadrons, or one new squadron to each two new infantry divisions; eight balloon companies, ten field hospitals, ten ambulance companies, 22 field bakeries, six telephone battalions, 16 pack companies, six ammunition trains and six supply trains.

In preparation for the enormous task of training this great army, the existing regular establishment and the national guard is being brought to full war strength. The regulars when all five additional increments provided for in the national defence act have been added will total 11,233 officers and 293,000 men of all arms. Since April 1 nearly 50,000 recruits have been obtained, bringing the army up to nearly 180,000.

BRITISH LABOR LEADERS EN ROUTE TO WASHINGTON

(By Associated Press.)

NEW YORK, May 4.—British labor leaders appointed by their government as official advisors to American labor in the conduct of the war arrived in the United States today and will proceed immediately to Washington.

SAVE YOUR BOTTLES

The home canning specialists of the U. S. department of agriculture urge every housekeeper to save bottles, especially wide-necked ones, for putting up fruits, preserves, jellies, jams and fruit juices. Saving of bottles is highly important, they say, as there threatens to be a serious shortage of regular jars and preserving cans this season.

The fruit products named, if sealed with corks and paraffin, can be kept perfectly in these makeshift

containers. Jellies, jams and preserves, can be kept even in ordinary drinking glasses by the use of paper and paraffin. Fruit juices should be packed in ordinary small-necked bottles.

Vegetables, soups and meats, on the other hand, to keep must be sealed by the usual fruit jar or tin can packing methods. Reserve regular containers for foods that can not be packed in bottles.

The specialists are also urging all members of canning clubs and others not only to can products, but to dry and evaporate all such products as apples, pumpkin and squash.

The British army has arrived. Its artillery beats all creation.—Springfield Republican.

LUCKY STRIKE cigarette

It's toasted

THINK of a cigarette "served" to you as appetizingly as the hot, buttered toast that comes to your breakfast table.

Well, that's the idea on this new Lucky Strike cigarette: the tobacco—it's toasted. There's a thought to make your mouth water for a new cigarette flavor.

Until we discovered the toasting principle, a good ready-made cigarette from Burley tobacco wasn't possible; flavor wouldn't hold.

Yet there was the big million-man-power affection for Burley—60 million pounds poured from those green, blue and red tin boxes last year.

The old kitchen stove—the toasting fork

So we worked five years—then came the big simple idea of toasting the tobacco to hold the flavor. Now, enjoy a really delicious new cigarette flavor: Lucky Strike—the real Burley cigarette—it's toasted.
